EXPERIENCE

Live Face Off | Lead Backend Developer live | Github *Jan 2018 - Current*

Live Face Off allows friends and family to connect with one another via webcam and chat to enjoy some time together. The application features two modes of gameplay, with more to come in the future.

- Developed the backend using **Node, MongoDB** via **Mongoose,** and **Express.**
- Linked the client to the server via **RESTful API's**, and deployed with an **AWS EC2** instance.
- Implemented **Google and Facebook Oauth**, as well as a **local login strategy** using **Passport**.
- Outlined daily goals and tasks within **Meistertask** to best follow the **Agile Methodology.**
- Created a systematic webcam feed using **TokBox API**, which uses **WebRTC** technology.
- Mirrored client to server data transferring with **Socket.io**, allowing for real-time integration.
- Applied **Webpack** to render a **React** frontend, **Materialize CSS** for design, **JSX** for a form validation component, and **Axios** calls to gather required information from the server.

State Farm | Account Manager *Sept 2015 - Oct 2017*

- Top Salesman for over 2 years, producing a book of over 350 clients.
- Utilized technologies including Prospector+ and other State Farm proprietary software daily.

Asmerc Auto Sales | Marketing and Outreach Lead *June 2012 - Sept 2015*

- Managed the online presence of the sales team, periodically updating the website.
- Enhanced business traffic through use of **SEO** and **SEM**.

APPLICATIONS

Student Grade Table live | Github

Student Grade Table is a Content Management System for keeping track of students, grades, and courses.

- Built using **Javascript** in combination with **jQuery** for the ability to dynamically create most elements.
- Responsive on both mobile and desktop due to a **HTML5**, **Bootstrap3,** and **CSS3** front-end.
- Constructed a **PHP** backend that allows users **CRUD** operations within the **MySQL** database.
- Initiates a cronjob everything thirty minutes to rebuild the database on the A**pache2** web-server.

Hackathon - Beets & Eats live | Github

An on the go event planner that combines restaurants, breweries, and local events for an easy night out

- Utilized **AJAX** calls to Google, Yelp, and Ticketmaster to gather data based on a specific location.
- Routed the Javascript code to Yelp's API through a proxy built using a Node and Express server.
- Invoked a **Bootstrap4** design for the layout of the app.

EDUCATION

University of California, Irvine

- Bachelors of Arts in Social Ecology
- Honors Award - Outstanding contribution to the community

LearningFuze | Accelerated Web Development Program

- Over 800 hours of programming

INTERESTS & ACTIVITIES

- Cryptocurrency and the evolution of the Blockchain
- Financial Novels - to plan for my future
- Playing with my five dogs
- Attending hockey games - Go Ducks!
