Experienced: MySQL, PHP, Apache, Ubuntu, AWS, ReactJS, UI/UX

Tools: Git, Github, Chrome Dev Tools, VS Code, Postman, ES6, Slack, PhpStorm, Meistertask

APPLICATIONS

Live Face Off live | Github

Live Face Off allows friends and family to connect with one another via webcam and chat to enjoy sometime together. The application features two modes of gameplay, with more to come in the future.

- Main backend architect, utilizing **Node, MongoDB** via **Mongoose, Express**, and more to implement and construct the database, correctly link the client to the server, and deploy to **AWS** .
- Implemented **Google and Facebook Oauth**, as well as a **local login strategy** using **Passport**.
- Managed the team using **Meistertask** to outline daily tasks, and the **Agile Methodology** to conduct stand-ups every morning. We merged our branches to **Github** frequently in order to avoid any conflicts.
- Created a systematic webcam feed using **TokBox API**, which uses **WebRTC** technology.
- Mirrored client to server data transferring with **Socket.io**, allowing for real-time integration.
- Used **Webpack** to render a **React** frontend, **Materialize CSS** for design, programmed form validation in **JSX**, and **Axios** calls to gather required information from the server.

Hearthstone Battle live | Github

Hearthstone Battle is based off of one of Blizzard's top grossing games, Hearthstone. It is a single or multiplayer experience that challenges the user(s) to correctly match 9 pairs of cards without dying.

- Built using **Javascript Object Oriented Programming** in combination with **jQuery** for the ability to dynamically create most elements.
- Both mobile and desktop responsive due to **CSS3** Flexbox and **media queries**.
- Exercised the **ES6** paradigm in tangent with higher order functions to develop the core functionality.

Hackathon - Beets & Eats live | Github

An on the go event planner that combines restaurants, breweries, and local events for an easy night out

- Utilized **AJAX** calls to Google, Yelp, and Ticketmaster to gather data based upon a specific location.
- Implemented a **Bootstrap4** design for the layout of the app, all within a **48** hour deadline.

PROFESSIONAL

State Farm | Account Manager   *Sept 2015 - Oct 2017*

- Top Salesman for over 2 years, producing a book of over 350 clients.
- Trained new employees on how to use SF technologies and close sales.
- Utilized technologies including Prospector+ and all State Farm proprietary softwares to assist with daily tasks.

Asmerc Auto Sales | Marketing and Outreach Lead   *June 2012 - Sept 2015*

- Managed the online presence of the sales team, periodically updating the website.
- Marketed vehicles through the company website, Cars.com and other sales forums.
